SAKSHI GAUTAM

Full-Stack Developer (MERN) | Aspiring Stipend-Based Intern

Nagpur, Maharashtra | 8010425137 | gautamsakshi166@gmail.com

GitHub: github.com/SakshiCode731 | LinkedIn: sakshi-gautam-9317292b9

OBJECTIVE

Third-year B.Tech (IT) student with hands-on MERN stack experience (React, Node.js, Express.js, MongoDB). Built multiple real-world and hackathon projects, including a real-time job-matching platform and an AI-powered interview prep tool. Seeking a stipend-based internship to contribute to production-level projects and grow as a developer.

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Responsive Design (Flexbox/Grid)
- Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io
- Database: MongoDB, Mongoose
- Tools & Platforms: Git, GitHub, VS Code, Postman
- Core Concepts: MERN Stack Development, CRUD Operations, API Integration, Version Control

PROJECTS

RozgarSaathi – Hyperlocal Daily Gig Platform — *Node.js, Express.js, MongoDB, JavaScript, Socket.io, JWT*
Repo: github.com/SakshiCode731/Team_Elite_TGPDS-02_RozgarSaathi

- Built a hackathon project (Team Elite) connecting daily-wage workers with nearby employers through geo-based, skill-matched job listings — eliminating middlemen and commissions.
- Implemented real-time job updates using Socket.io, JWT-based authentication, and a mock Aadhaar-OTP verification flow for worker identity.
- Designed core features including a 2–5 km radius job feed, worker availability toggle, and auto-expiring 24-hour job posts.

AI Interview Prep Assistant — *MERN Stack (React, Tailwind CSS, Node.js, Express.js, MongoDB)*
Repo: github.com/SakshiCode731/AI-Interview-Prep-Assistant

- Developing a full-stack MERN application that uses AI to assess interview readiness, identify skill gaps, and guide students toward placement success.
- Building a responsive React + Tailwind CSS frontend connected to an Express.js/MongoDB backend for user data and progress tracking.

Password Generator App — *HTML, CSS, JavaScript*

- Built a secure password generator with adjustable length, character-type options, and a copy-to-clipboard feature.
- Designed a fully responsive UI using HTML, CSS and JavaScript.

YouTube Clone — *HTML, CSS (Flexbox/Grid)*

- Cloned the YouTube homepage with a fully responsive layout using pure HTML and CSS Flexbox/Grid.

Virtual Assistant — *JavaScript, Web Speech API*

- Developed a voice-controlled browser assistant using the Web Speech API with real-time speech recognition.

Weather App — *JavaScript, OpenWeather REST API*

- Fetched live weather data via the OpenWeather REST API with dynamic city search and DOM manipulation.

EDUCATION

B.Tech – Information Technology
G. H. Raisoni College of Engineering, Nagpur | 3rd Year | CGPA: 7.8

CERTIFICATIONS & TRAINING

- Android Development Intern — R.T. Soft Solutions Pvt. Ltd. (45-Day Training, July 2024)
- Full Stack Java Developer — Simplilearn (Completed, September 2024)
